# On the Subject of Flavor Text
You have been made useful.

- The module will display a flavor text from one of the other manual pages (including mod manuals).
- Press the "Y" button if and *only* if a module with that flavor text in the manual is present on the bomb.
- If no such modules are present, press the "N" button.
- Pressing the wrong button will result in a strike and change the displayed flavor text.
- Note: If there are several modules with the same flavor text, press "Y" if *any* such modules are present on the bomb, and "N" if *none* are present.

On the Subject of Flavor Text EX

You tasted its flavor. The real challenge begins.

<u>Defusing this module requires the expert to have a device that can connect to the World Wide Web.</u>

- The module will display a flavor text from one of the other manual pages (including mod manuals).
- Find a module that has the displayed flavor text in the manual. It might not be present on the bomb. If there are several, pick either.
- Press the buttons with the digits that appear in the Steam ID of the mod that module is from in the order of their appearance in the ID. If it's a vanilla module, ignore this step altogether.
- Press all the other buttons in any order. The flavor text and the digits will change after doing so.
- To disarm the module, press all four buttons correctly for three flavor texts in a row.
- Note: Pressing a button twice or too early in the sequence will result in a strike and change the flavor text and digits.
